## PM - Parallel Shaft

### Features:

- Ratios from 2.6/1 up to 278/1
- Various mounting options
- Accepts standard IEC flange and shaft motors
- From 0.09kw up to 30kw
- Strong, robust design
- Available ATEX certified

The PM range of Parallel Shaft gearboxes is offered with ratios ranging from 2.6/1 right up to 278/1; couple this with input powers to over 30kw and a multitude of mounting options and you have an incredibly versatile range of gearboxes.

As with all our gearboxes acceptance of IEC flange and shaft motors is the norm to allow for ease of maintenance. The STM PM - Parallel Shaft gearbox is sturdy and durable.

Through the stocking of component parts for the PM range we can offer these gearboxes ex-stock. This allows for the quick procurement of spares and repairs should the need arise.

To discuss these or any of our other exciting products please give our dedicated sales team a call today and see what STM UK can do for you.
