

STM Power Transmisson Ltd
Empowering your ideas...

EX - Planetary

Features:

- Ratios from 1:3.5 up to 1:2500
- Torque range from 1000nm to 85,000nm
- Suitable for continuous, reversing & intermittent operation
- High torque in relation to size
- Compact design
- Can be installed in any mounting position
- High radial load on output shaft
- Ground gears to achieve lower noise levels
- Available ATEX certified

With torque ranging from 1000nm to 85,000nm, STM EX Planetary Gearboxes are ideal for many different applications including mobile and fixed. All EX gearboxes are available with a multitude of input and output options and are able to accept IEC electric, Hydraulic and Pneumatic motors.

Planetary Gearboxes are designed to offer high torque in a compact size due to the gear arrangement so offer the opportunity to reduce the size and weight of your drive. These gearboxes are ideal for applications where high torque and low speeds are required and also where shock loads are the norm.
